

TO OUR VALUED CUSTOMERS:

COVID-19 is having a dramatic impact on our world, customers, and employees.

I want to share an update on what Regis Manufacturing is doing to keep our customers and our people safe while continuing to deliver our quality products around the world.

Regis is following the guidance of global health experts at the World Health Organization (WHO) and U.S. Centers for Disease Control (CDC) on preventing the spread of the COVID-19 virus. We are reminding our employees about frequent hand washing, and we are regularly cleaning and disinfecting our facilities and equipment. All employees are maintaining the recommended social distancing while at work and are urged to shelter in place while not at work. Importantly, we are asking that our employees stay home from work if they feel sick.

Many people are asking the question: is it safe to receive and handle a shipment? The WHO and CDC have stated that the likelihood of catching the COVID-19 virus by touching cardboard or another shipping container is low.

Regis operations team are experienced with adapting to changing conditions, and are developing contingency plans to address any changing environment.

Regis continues to operate full time from our main warehouse as well as our numerous warehouses throughout North America and have built up inventory levels to accommodate all our customers. Be assured our team is working to continue to serve the needs of our customers during this time while keeping our employees safe.

As always we are available via phone or email to answer all your questions.

Thank you for trusting us with your business.
60 YEARS AND COUNTING!!!

JASON MORDEN
VP, REGIS MFG
